

## MDS-Nx Installation Instructions

Updated: 10/28/20 - djf

### Option A. Automated Install (PREFERRED)

The MDS-Nx System installation can be automated for your server environment, for Cloud Customers TSH will provide the automated installation email to allow you to download and setup the MDS-Nx Client. Please Review the email sent with your login instructions and setup information.

Autosetup for user stplive On Account STP generated on 04 NOV 2020 at 04:30:31pm

We removed extra line breaks from this message.

KStudio – Outlook Script E... API Tutorial for Outlook TeamViewer + Get more add-ins

Step 1. Download the Latest Version of MDS-Nx (WinMDS)

\*\*\* Please make sure you have administrator privileges on the PC you are installing MDS-Nx on. \*\*\* To download MDS-Nx go to <http://support.tshinc.com/> Under Support Information & Download click on MDS-Nx Client Software and choose the current WinMDS Release.  
OR Just Click Below.  
Download Link: <http://crs.tshinc.com/crs/winmds/setup.exe>

Current MDS Version: <12.1.10>

MDS-Nx should be downloaded and installed.  
If you need detailed instructions please click below.  
<http://support.tshinc.com/MDSnxinstall.pdf>

Step 2. To perform an Automatic Setup (please note: you can also manually setup)

Follow the web link below  
<http://rs6000d.tshinc.com:7373/userinfo/down.php?file=59431.199716stplive-AUTOSETUP.INI>

This will download the AUTOSETUP.INI file to your pc, make sure to save the file to your DOWNLOAD folder. This is where MDS-Nx will look for it. Alternately you can drop the attachment into your download file folder.

Open MDS-Nx with no profile, by clicking on the desktop icon MDS that gets put there during MDS-Nx installation or by clicking the WINMDS.EXE file from the MDS For Windows folder. MDS-Nx will automatically find the AUTOSETUP.INI file and set up a new desktop icon with the settings from the MDS User. (See Below)

The new session will be named the same as the Account name. ie, STP

Username stplive

### Step 1. Download the Latest Version of MDS-Nx (WinMDS)

\*\*\* Please make sure you have administrator privileges on the PC you are installing MDS-Nx on.

\*\*\* To download MDS-Nx go to <http://support.tshinc.com/> Under Support Information & Download click on MDS-Nx Client Software and choose the current WinMDS Release.

OR Just Click Below.

Download Link: <http://crs.tshinc.com/crs/winmds/setup.exe>

MDS-Nx should be downloaded and installed.

If you need detailed instructions, please see notes in the manual setup below.

Step 2. To perform an Automatic Setup, follow the web link in your email to download your config file.

[note this link is unique for each user and setup – and expires after 30 days]

Example Below (your email should have this link)

<http://rs6000d.tshinc.com:7373/userinfo/down.php?file=xxxxxxxxxx-AUTOSETUP.INI>

Launch Meeting - Zoom x Customer Reporting System - Up x Welcome to the TSH MDS-Nx DC x +

Not secure | support.tshinc.com/download.htm

**The Systems House, Inc. mds NX**

**IMPORTANT NOTES:**

- **The current version is MDS-Nx 12.1.10 , this version REQUIRES MDS version 12.90806 or above to run properly. It requires MDS version 12.91001 to scan/load files.**  
*If you are not sure of your MDS Release please contact support@tshinc.com*
- **If you are on Release 12.07910 then you should install version 8.3.30 below.**
- **If you are on any previous MDS version then either use the 8.2.1 version supplied below OR contact TSH to arrange for an upgrade to the current version, the upgrade for WinMDS does not require a full MDS upgrade just an SSS toolset upgrade.**
- **Release notes for version MDS-Nx 12.1.10 README.TXT**

You must have a login to be able to access our Sites.  
If you do not have a login then please contact [Support@tshinc.com](mailto:Support@tshinc.com)

This site is designed to allow both customers and internal support staff to download the latest release of MDS for Windows

Last update: KPL 10/16/2020

**Click here for Detailed Installation Instructions for Windows Installation**

Once downloaded simply double click the setup.exe or unzip the file and run setup.exe

Contact [TSH](#) for our new MDS Autosetup tool.  
No more entering all the settings manually on initial startup.  
If you are using our Cloud Service this information was emailed to during your setup.

**Current WinMDS Releases:**

**Version 12.1.10 for MDS Releases 12.90806 and above setup12110.exe**

**Patch Version 12.1.10 only for upgrading 11.5.7 and above to 12.1.10 patch12110.exe**

This type of file can harm your computer. Do you want to keep AUTOSETUP.INI anyway?   setup (1).exe  x

If you get a security warning you can click the Keep Button.

This will download the AUTOSETUP.INI file to your pc, make sure to save the file to your **DOWNLOAD** folder.

This may be the My Downloads or My Document Downloads File Folder.

This is where MDS-Nx will look for the config file.

Alternately you can drop the attachment into your download file folder.

By Default, most web browser will save the file to that location automatically.

It should be named AUTOSETUP.INI (if you have multiple files you can delete them and download a new copy)

Open MDS-Nx with no profile, by clicking on the desktop icon MDS that gets put there during MDS-Nx installation or by clicking the WINMDS.EXE file from the MDS For Windows folder.

MDS-Nx will automatically find the AUTOSETUP.INI file and set up a new desktop icon with the settings from the MDS User. (See Below)

The new session will be named the same as the Account name. i.e., STP in our example

Prior to the new user logging on, you will need the operator profile setup. This should be done by your Inhouse MDS system administrator, as the Inhouse Administrator will decide what permissions or menu options the new user can access.

Should you have any issues - Please email [support@tshinc.com](mailto:support@tshinc.com) or call 1-973-777-8050.

## Option B. Manual Install (OPTIONAL)

Open your favorite internet Browser Internet Explorer/Firefox/Chrome and go to <http://support.tshinc.com/>

Click on the link “**MDS-NX Client Software**” in the Support Information & Downloads section (top right corner)

The screenshot shows the TSH Support Site homepage. The browser address bar displays "Not secure | support.tshinc.com". The page features a logo for TSH (The Systems House, Inc.) and the title "TSH Support Site". There are two main navigation buttons: "Customer Reporting System" and "Support Information & Downloads". Under "Customer Reporting System", there is a login form with fields for "Login" and "Password", a "Login to CRS" button, and a "Login" button. Below the login form are links: "Register for Our CRS System", "Full CRS Login Page", and "View Online Documentation for CRS". Under "Support Information & Downloads", there is a list of links: "MDS-NX Client Software", "Remote Support Via Teamviewer", "ODBC Drivers (32-Bit) V4.0x", "ODBC Drivers (32-Bit) - 2011 version", "ODBC Drivers (64-Bit)- 2011 version", "ODBC Drivers (32-Bit) - 2016 version", "ODBC Drivers (64-Bit)- 2016 version", "MDS Hostname Instructions", and "TSH Docs and Support Guides (Please login to CRS)". At the bottom, there is a "Uptime Statistics and Speed Test" section with a link to "Custom Speed Test from Speedtest.com". The footer includes the TSH logo, "The Systems House, Inc.", "1-800-MDS-5556 • www.tshinc.com", and the "SPEEDTEST" logo.

If you see the popup with video options, you may choose to review the overview of the MDS-nx system. or Click anywhere to close the popup box and download your software.

When setup is complete you should see a White and Red MDS Icon on the desktop. If you do not you can navigate and run the default setup. The default path is C:\Program Files (x86)\MDS for Windows

Open MDS-Nx by Double Clicking on the MDS Icon

Go to the 'Settings' → 'Connection Settings' menu

Host name is Your Server IP address or name

Username is your username

Password is your password

Operator Code is your MDS Login – Note you may use your username as your operator to simplify login.

Choose the Appropriate Login Style – If unsure choose none (or contact support@tshinc.com)

Account is not required unless you have chosen a login style if so, enter the Name of your Database IE DEMO.12

Make sure “U2 Device licensing” is checked if you are using multiple logins from a single PC.

You will need to configure ODBC Settings:

ODBC Username: your ODBC username

ODBC password: your password

**Note: TSH will provide passwords for SAAS/CLOUD accounts, others need to contact their System Administrator, MDS-Nx Integrates with Windows Active Directory User Databases and Third Party SSO (Single Sign On) Providers.**

Click “OK” to save your configuration

Go to “File” menu and click “Save Session as”

Enter a Name you will remember this session by – IE MDS-*Server name-username*

This will create an icon on your desktop – you can double click this to login  
If you setup the connection properly you should see a screen like.

Then once you click ok you are logged in and at the main Dashboard

Since each operator has their own dashboard - **you will need to setup the OPERATOR DASHBOARD Maintenance ON THE UTILITY MENU.** Or you may run the utility to create default operator dashboards on the utility menu.

To update your KPI's and Graphs you can click on the Wrench icon under the Key Indicators tab.

The screenshot shows a software interface with a menu on the left and a main content area. The 'Tasks' table lists several 'Management Meeting' entries with dates and statuses. The 'Key Indicators' section has tabs for 'Charts' and 'Key Indicators'. A red box highlights a wrench icon in the 'Key Indicators' section.
